

# REI POLY SPREADER

3PT. 860 lbs. Capacity Spin Poly Fertilizer Spreader has bottom opening gate to ensure constant and accurate flows that are not available on side outlet spin spreaders.

Variable positioning gate openings and fin adjustments allow material to drop on different positions of the spinning disc, thereby giving a left-right-center spread pattern.

Dependable gearboxes provide years of excellent service, and the poly hoppers offer long lasting protection from fertilizer-induced rusting among other damages.
